### Professional Profile

---

- IT Coordinator with a Bachelor of Computer Information Systems (Security concentration) from the University of the Fraser Valley (April 2026), with hands-on experience in IT support, system administration, endpoint management, and infrastructure troubleshooting.
- Experience supporting users and systems across enterprise, nonprofit, academic, retail, and broadcast environments using Microsoft 365, Azure Active Directory, Intune, Sophos, Windows, and Linux systems.
- Strong background in technical troubleshooting, device deployment, networking, and documentation with a growing focus on cybersecurity and infrastructure operations.

### Technical Highlights

---

- Support IT operations for a large enterprise office, including asset management, procurement, and onboarding/offboarding coordination.
- Configured and deployed managed devices using Microsoft Intune and Azure Active Directory.
- Maintained Linux-based broadcast infrastructure supporting live radio streaming services.
- Diagnosed and resolved system, networking, and endpoint security issues across Windows and Linux environments.
- Built virtualized lab environments to practice system administration, networking, monitoring, and infrastructure troubleshooting.

### Technical Skills

---

- IT Operations: Asset Management, Onboarding/Offboarding, Procurement, Process Documentation (Scribe, Tango)
- Operating Systems: Windows, Windows Server, Linux (Ubuntu, Alpine), macOS
- Cloud & Identity: Microsoft Azure, Azure Active Directory, Microsoft Intune, Microsoft 365
- Networking: TCP/IP, VLANs, VPNs, Network Troubleshooting
- Security Tools: Sophos Endpoint Security, Wireshark, Nmap, Cisco Packet Tracer
- Virtualization & Infrastructure: QEMU, Virtual Machines, NAS, Remote Access
- Programming: Python, Java, SQL, JavaScript, HTML, CSS
- Tools: Git, Jira, Confluence, Bitbucket, Linux CLI, Microsoft Office

### Experience

---

#### IT Coordinator — Microsoft

Jul 2026 – Present

Environment: Asset Management, Onboarding/Offboarding, Procurement, IT Operations

- Support IT operations for a large enterprise office, including asset management, procurement, and logistics coordination.
- Coordinate onboarding and offboarding workflows for employees and equipment.
- Document and standardize recurring IT processes to improve consistency and handoff quality.

#### IT Support Analyst (Practicum) — Archway Community Services

Jan 2026 – Jun 2026

Environment: Microsoft 365, Azure AD, Intune, Sophos, Windows, Networking

- Provided Tier 1–2 IT support across a multi-site nonprofit environment troubleshooting hardware, software, and connectivity issues.
- Configured and deployed workstations using Microsoft 365, Azure Active Directory, and Microsoft Intune.
- Managed endpoint security and compliance using Sophos endpoint protection.
- Onboarded systems to the organization domain and configured user accounts, permissions, and device policies.
- Supported users with Microsoft 365 services including Outlook, Teams, OneDrive, and SharePoint.

#### Volunteer IT Support — CIVL Radio Network

2025 – Present

Environment: Linux, Icecast, Broadcast Software, Networking

- Maintain Linux-based broadcast infrastructure supporting Icecast streaming services.
- Troubleshoot broadcast stream interruptions involving BUTT broadcast software and server connectivity.
- Diagnose network configuration issues affecting streaming reliability.
- Assist with server monitoring, maintenance, and system documentation.
- Create troubleshooting guides to support volunteers managing broadcast systems.

#### IT Support Technician (Geek Squad) — Best Buy Canada

Oct 2025 – Dec 2025, Feb 2026 – Jun 2026

- Diagnosed hardware, operating system, and software issues across Windows and macOS systems.
- Performed malware removal, operating system troubleshooting, and device configuration.
- Provided data transfer, device setup, and technical troubleshooting for customer systems.

- Followed structured repair workflows and documentation standards in a high-volume service environment.
- Explained technical solutions clearly to non-technical customers while maintaining high customer satisfaction.

**Student Lab Monitor — School of Computing, University of the Fraser Valley** 2025 – 2026

- Provided technical support during computing labs and examinations for CIS and COMP courses.
- Assisted students and instructors with software installation, permissions, and system troubleshooting.
- Maintained smooth lab operations by resolving hardware and access-related issues quickly.

**IT Support Intern — Divya Gyan International School** 2023 – 2024

*Environment: Windows, Networking, Educational Lab Systems*

- Installed and configured computer lab systems including operating systems, software packages, and network connectivity.
- Provided Tier 1 technical support for students and staff resolving software, hardware, and system access issues.
- Documented installation procedures and troubleshooting steps to support consistent system setup and maintenance.

## Projects

---

**Infrastructure Home Lab — Linux, Virtualization, Networking** 2025 – Present

- Built an Ubuntu Server home lab with virtual machines and NAS storage to simulate enterprise IT infrastructure.
- Configured remote access, backup workflows, and shared storage while documenting system setup.
- Used the environment to practice Linux administration, service configuration, and infrastructure troubleshooting.

**Enterprise Device Management Lab — Azure AD & Intune** 2026

- Built a simulated enterprise environment using Azure Active Directory and Microsoft Intune.
- Joined Windows devices to Azure AD and configured device enrollment through Intune.
- Applied security policies, device compliance rules, and application deployment through endpoint management.
- Documented device lifecycle processes including enrollment, configuration, and policy enforcement.

**Linux Infrastructure Monitoring System —** 2026

- Built a Linux server monitoring environment to track infrastructure health and performance.
- Configured monitoring for CPU, memory, disk, network activity, and service availability.
- Implemented dashboards and alerting concepts for troubleshooting system interruptions and failures.
- Documented monitoring workflows and system metrics for performance analysis and administration.

**Virtualization Networking Lab — QEMU / Alpine Linux** 2026

- Built interconnected virtual machines using QEMU and Alpine Linux to simulate isolated network environments.
- Configured VM connectivity and tested communication through command-line networking tools.
- Diagnosed and repaired corrupted qcow2 disk images using qemu-img utilities.

**UFV Bookstore Digital Transformation Project —** 2025

- Led a team project designing a digital transformation strategy including system architecture and project planning.
- Managed project milestones and stakeholder communication to deliver the plan on schedule.

## Education

---

**University of the Fraser Valley** *Graduated: April 2026*

Bachelor of Computer Information Systems, Security Concentration  
Abbotsford, BC

## Certifications

---

- Google IT Support Professional Certificate (2024)
- Cisco Networking Basics (2024)
- Cisco Introduction to Cybersecurity (2023)
- CS50 AI with Python (2021)
- UPES Hackathon 8.0 Winner (2024)
